

Genesis on Demand™ G.O.D. Vision Statement

The biggest goal for Genesis on Demand™ G.O.D. is to create a super food so unique, so powerful and supercharged with high vibrational electromagnetic energy that it will literally raise the vibration of humanity and will directly enable rapid natural human adaptation to more quickly evolve and elevate our species. Not only will this solve world hunger, but it would eradicate all sickness and dis-ease forever. G.O.D. is bringing food back to what it originally was, at its highest form. We are taking the rate of photosynthesis from it's currently very low inefficient level of 4% and we are taking it to 100%.

The atmosphere is not separated like onions, the air I breath is the same for everyone in this realm. The crux of the major Issue we face is that Graphene nano particles have been coated on the inside out of every cell everywhere, down to the cell nuclei. We believe this is not going to happen in the future but that it's already been done. The goal of this is transhumanism, hooking up consciousness to AI. Their goal is to directly disconnect souls from God/Source, blocking our natural ability to connect with it. This is done biologically by way of DNA alteration through graphene technology. Graphene is everywhere, it's in mRNA injections, its being sprayed from the skies, it's in our food, water, earth, and even being broadcasted 24/7 through Radio Frequency in the air. They have essentially weaponized our own DNA and now have control of what you would call gene expression in real time also known as genesis. They are transforming the receivers (us) into a syncopation of limited genetic expression, thus taking us away from the infinite and limiting us into a box.

Our cell nuclei is the cradle of life. It's the garden of Eden. It's also the book of life as far as

holding the entire code of possibilities for genetic development, and to consider closing off that pathway is the very nature of suicide. Food is no different than that of a hard drive. It stores data. Data is then turned into building blocks that are created inside of the cell nuclei. Let me say that again, ALL life is built from the inside out, starting with radiation signals that are identified from a quantum antenna inside of all cell nuclei.

Care to take one guess as to what that quantum antenna is.... its DNA!

And DNA is a byproduct of mRNA cues, specifically radiation. So, if one changes the outside environment with altered radiation states, and additionally alters the DNA by way of mRNA modifications, (hint, hint) they would essentially be able to remotely operate cellular development and that biological subject, game over.

So, what's the solution? How do you detox from something at the nano scale level which is below that of nature? Even if you did find a way to detox your immediately re-exposed as soon as you breath in. Here at G.O.D. we firmly believe the only way is through natural evolution and rapid adaptation. Doing so will allow us to maintain our direct connection to creation and allow those who have been affected to regain their connection. G.O.D. knows the problem and has the solution. This is our only mission, and we will succeed. G.O.D. is calling on you to help save us all.
